Practical-14

Admin Dashboard with Role-Based Access Control, Dynamic Menu, and Audit Log

Theory :

1. **Are dashboard values loaded dynamically from the database?**

   Answer: Yes, dashboard values are fetched dynamically from the database.

2. Is access restricted to admin users?

Answer: Yes, only authorized admin users can access the admin dashboard.

3. Are role-based menus working?

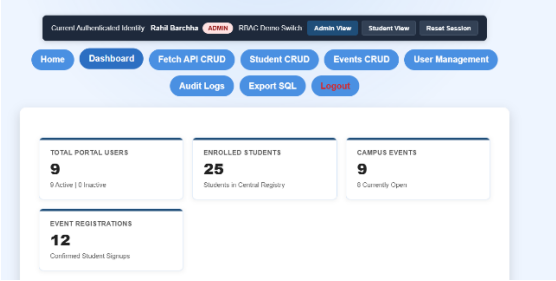

Answer: Yes, menus are displayed according to the user's role and permissions.

4. Are important admin actions recorded in audit_logs?

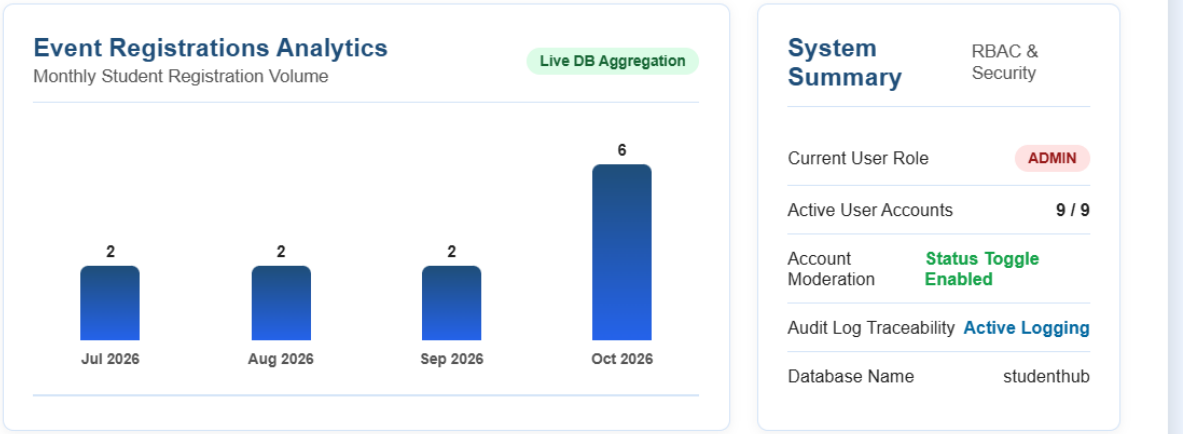

Answer: Yes, important admin actions are recorded in the audit_logs table for tracking and monitoring.

Result:

1)admin rights management

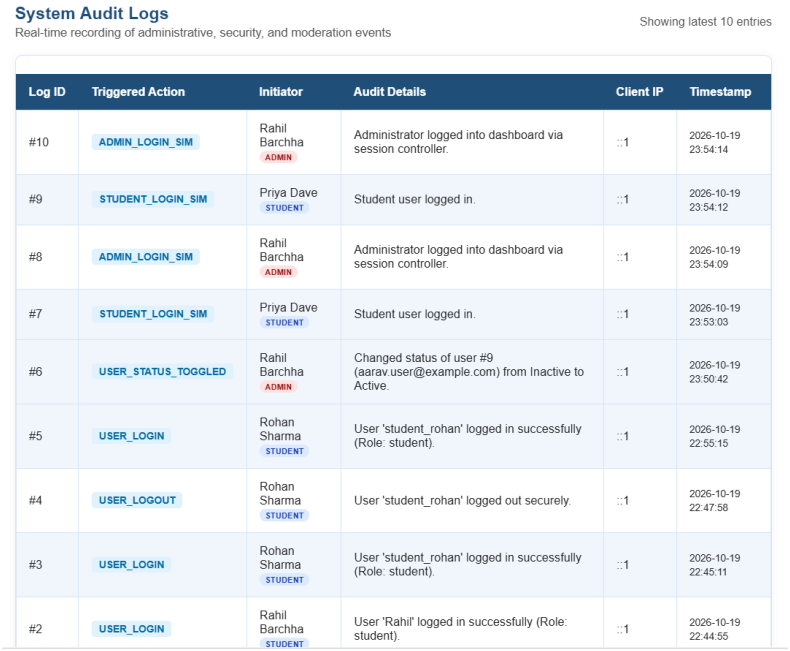

2) data analytics for events and summary

3)student account management via admin account

ID	User Account	Full Name	Role	Course	Status	Registered	Moderation Ac
#1	rahil_admin rahil@example.com	Rahil Patel	STUDENT	BTech_IT	Active	2026-10-19 21:39:30	Deactivate
#2	priya_dave priya@example.com	Priya Dave	STUDENT	BTech_CSE	Active	2026-10-19 21:39:30	Deactivate

Challenges Faced: I faced difficulties in fetching dashboard statistics dynamically from the database. I struggled with implementing role-based access control and displaying menus according to user roles. I also faced challenges in recording important admin activities in the audit_logs table.

Learning Outcome: I learned to create an admin dashboard with dynamic statistics and latest registration details. I understood how to restrict dashboard access to admins and display role-based menus. I also learned how to maintain audit logs to track important administrative activities.
